### Instrument List:

- [Yellow](#)

Discussion:

Each unit requires calibration. Two units have known issues that need to be resolved. Two-way communications should be available soon.

SN\_70: has not been visited since installation (collecting data at that time).

SN\_38: possible file corruption on camera OS.

SN\_37: has not been visited since installation (collecting data at that time).

SN\_36: difficult video signal adjustment required.

SN\_35: collecting data as of yesterday.

SN\_25: has not been visited since installation (collecting data at that time).
